

End of Line Management

PRESTIGE
working with initiative

We have an experienced team who can strip down your unsold products and make them ready for sale into new and/or foreign markets. Items such as gifts, labels and inserts can be added to the product before being finished and packed ready for shipment.

Debranding

To protect brand and product value we can debrand items before they are sold on via other sales channels or into overseas countries. We take great care to ensure the product is not damaged during this process and that it is fully prepared for its future purpose.

Repacking

We are able to repack almost any type and quantity of product into new configurations or branded packaging ready for distribution, sale or resale.

Precision Labelling

Our team is careful to ensure every label, sticker or band is placed in the right place. We also quality check labels to ensure they are correct before application and have a number of multi-lingual staff for products being exported to, or imported from, foreign markets.

Sell-through Strategies

Through our network of business partners, clients and suppliers we are able to source buyers for surplus stock both in the UK and abroad to help generate new income streams without loss of brand or product value.

Stock Destruction

End of line stock that cannot be sold should not incur on-going storage costs. We will alert you to items which may have been dormant for some time or which have reached their shelf life so that you can decide if you wish to retain or dispose of this stock.
